

North American Patient Organization and Advocacy Disclosure 2016.

Teva works with many organizations that advocate for patients around the world. Patient organizations and advocacy groups represent the needs of people living with medical conditions and provide healthcare companies with important advice from their own perspectives. Interacting with patient organizations enables Teva to understand the many ways health impacts life, inspires us to discover new possibilities in the development of new medicines and more.

In all of our interactions, Teva is committed to working in an ethical and transparent manner. When working together with patient advocates and groups, our behavior is characterized by the spirit of partnership, mutual respect and trust, openness and transparency, with an overarching commitment to bring benefits to patients and their families in a sustainable fashion.

Recognizing the importance of transparency and its role in developing trust-based relationships with stakeholders, the public and, more importantly, patients, Teva voluntarily discloses across **67** countries including the United States of America and Canada as part of its goal towards global transparency. All disclosure publications can be located via http://www.tevapharm.com/corporate_responsibility/global_patient_advocacy_engagement/.

Teva Pharmaceutical Industries Ltd. (NYSE and TASE: TEVA) is a leading global pharmaceutical company that delivers high-quality, patient-centric healthcare solutions used by approximately 200 million patients in over 60 markets every day. Headquartered in Israel, Teva is the world's largest generic medicines producer, leveraging its portfolio of more than 1,800 molecules to produce a wide range of generic products in nearly every therapeutic area. In specialty medicines, Teva has the world-leading innovative treatment for multiple sclerosis as well as late-stage development programs for other disorders of the central nervous system, including movement disorders, migraine, pain and neurodegenerative conditions, as well as a broad portfolio of respiratory products. Teva is leveraging its generics and specialty capabilities in order to seek new ways of addressing unmet patient needs by combining drug development with devices, services and technologies. Teva's net revenues in 2016 were \$21.9 billion.
